

## Culver City Cosmetic Dentist

Century Smile in Culver City is the site of the dental clinic of the cosmetic dentist, Dr. Mostofi, whose work has been seen by millions of television viewers on ABC's program Extreme Makeover. Dr. Mostofi and his talented team can straighten, whiten, brighten, and totally alter the appearance of patients' teeth to allow them to smile without complexes or embarrassment. In some cases, the dental treatment at Century Smile completely alters the lives of patients.

A healthy and beautiful smile is no longer a luxury. With the average lifespan extending beyond the promised three score years and ten, the need to keep teeth in a healthy and functional condition is essential. Patient comfort is top priority at the Culver City clinic of Century Smile. Cosmetic dentist, Dr. Mostofi, ensures complete relaxation assisted by the dulcet music, aromatherapy ambience, Tempur-pedi headrests, eye masks, blankets, and the joy of moist towels to freshen up. A waterfall soothingly runs in the background and Dr. Mostofi can provide oral sedatives for those patients who are nervous about dental treatment.

At Century Smile, digital imaging is used to demonstrate to patients what their smiles will look like after dental treatment. The cosmetic dentist and his team can help patients with missing teeth or bridges and dentures to regain complete function and stolidity by the use of dental implants. Dr. Mostofi likes to establish a long-term partnership with a patient to ensure the immediate dental treatment required, and to plan for long-term care. With a Doctorate of Dental Surgery from the University of Southern California (USC) School of Dentistry, Dr. Mostofi continues to investigate new technologies, materials, and techniques to improve his patients' dental health. Dr. Mostofi is licensed to administer sedatives to children and adults. He attends many seminars on implantology and cosmetic dentistry. The busy Culver City cosmetic dentist is a member of the American Dental Association, the California Dental Association, and the Western Los Angeles Dental Association. Any free time he might have is spent with his family, playing golf, or travelling.

Century Smile in Culver City offers a broad range of dental services, including the simple treatments of fillings and crowns. Regular check-ups and consultations will assist the cosmetic dentist to focus on preventative dentistry, which saves patients time and money. At Century Smile, a registered hygienist will gently remove plaque build-up and check for any periodontal disease. If there are signs of gum disease, the hygienist will use Arestin, an antibacterial medication and supply hints for improved brushing. Periodontal disease is reversible, but neglecting it could lead to other health problems.

The cosmetic dentist can replace silver/amalgam fillings with high-quality, natural-looking, porcelain filling. Air abrasion is a soothing technique, which allows the removal of tooth decay without the use of needles or drills. Fine streams of particles are directed at the tooth and gently remove the decay. A night guard can be worn to prevent cavities and cracks when sleeping patients grind their teeth. The cosmetic dentist at Century Smile recommends the virtually invisible aligner to wear instead of the traditional wire braces. With the aid of Invisalign®, teeth can be straightened over a period and the aligner can be removed for brushing, eating, or special events. The aligners are changed every two weeks and this orthodontic treatment is FDA approved
