

Amazing Facts About Generic Viagra

Due to the exertion and fast pace of the contemporary life the problem of masculine sexual disorder gets increasingly perturbing. The medical product is manufactured by the corporation Pfizer. The destination of Viagra is to treat sexual dysfunction. Viagra is presented on the market in the form of 25mg, 50mg and 100mg pills.

The well-known medicine was initially created to treat one of the sorts of heart disease. The researches indicated that the medicine isn't efficient in curing heart problems, but brings positive results in treating sexual disorder. So, Viagra medicine was patented in 1996, and by 1998 it had already passed all FDA tests. It gained great popularity on the market at once.

There are different reasons for getting erectile dysfunction. It may be caused by a physical injury or by a psychological scar. In rare cases masculine erectile dysfunction may be caused by disturbance of other organs. Whatever provoked masculine erectile disorder the consequences are the same: a man is not able to sustain the erection during the coitus or sometimes the erection is even difficult to achieve.

The action of Viagra is based on the relaxation of penis muscles following by erection. You should take one tablet a day, and it will ensure you an erection during the coitus. Keep in mind that Viagra doesn't produce erection automatically. You will still need erotic stimulation to get an erection. Moreover, the influence of the medication falls after the coitus that's why Viagra medication cannot be reputed as a constant cure for masculine erectile dysfunction.

The invention of these drugs has offered a salvation to those suffering of impotency. In order to buy Viagra drug you'll need a prescription. When you get the drug from on-line medical store, keep in mind that prescriptions may be filled on its website. To take decision what amount of the medications to purchase you should address to a doctor on account of the duration of the treatment.

Though erectile disorder cannot be treated easily, the PDE medications provide sort of a solution for this problem. But nevertheless, remember that these medications were invented not so long ago to foresee all the long-term side effects such as headaches, disordered stomach, sweating and others. Pay attention to what you feel and address to your physician immediately if you think that something is out of order.
